PROJECT DESCRIPTION

*CITY PREFERS INTERSECTION TO BE INCLUDED IN VETERANS DR. PROJECT. Align
 Fields Ave at its intersection with MLK Jr. Blvd. Provide left turn lanes on all four legs. Signalize the intersection.

COMMENTS

Include w/roadway project-if preferred. If MLK Jr. Blvd. is widened to the South and the South leg of Fields Ave is widened to the West, there may be as many as five residents displaced. This is the scenario reflected in the estimated cost. Another alternate may be the use of extensive retaining walls on all four quadrants and widen each road semitrilaterally. Some of the homes may still be adversely impacted.
