PROJECT DESCRIPTION

Add access control to all four quadrants. Add left turn lanes to all four quads with length sufficient for peak hour traffic. Upgrade signal for turn movement. Speed limit through the area will most likely have to be lowered to 45 mph due to curb and gutter for access control. Add sidewalk due to potential pedestrian traffic from all of the schools (at least in the two east quadrants).

COMMENTS

There is a Headstart, Elementary and Middle School all in this immediate area, therefore, the area is very busy during school hours. Traffic has sought out alternate routes such as Old Crider, S. Boyd and Houston Valley Roads. A thorough traffic study will be needed to show justification for the project. GDOT would need to sponsor the project.
