PROJECT DESCRIPTION

Widen Tibbs Br. Rd to inside of curve and turn Keiths Mill Rd 90 degree at intersection. Build in conjunction with one of the adjacent intersection improvements to make the project cost effective.

COMMENTS

Minor improvement on Tibbs Br will open up sight distance around the curve. This can be accomplished by moving the fence line back slightly and widening the road to the inside of the curve. Turn Keith Mill Road 90 degree to eliminate the percieved yeild situation due to the sharp skew of the intersection.

Remove undergrowth and add extra pavement width to inside of curve
