PROJECT DESCRIPTION

Improve lt turn on S. Dixie(S bound), rt turn on S. Dixie(N bound) and rt turn on W.Industrial, signalize intersection (traffic study required to finalize signal). Estimate reflects only phasing a signal at Lucille and minor grade adjustment to provide a better vertical intersection w/S. Dixie.

COMMENTS

Industrial Blvd serves as an E-W Connector between S Hamilton/Abutment Road to the West and South Dixie Hwy to the East. Lucille Street serves a small residential area. The major problem will be the %grade of Lucille Street. If Industrial Blvd is moved north to align w/Lucille, a trucking company will be adversely effected and if Lucille is moved south, a used car sales lot will be adversely effected. Improvements are needed most @ Industrial Blvd.
