

Westside Community Park Master Plan Narrative:

The goal for The Westside Community Park is to create a destination for the Westside neighborhood and beyond and will be a true asset for the County. The proposed Master Plan strives to give form to the community's interests.

Using the Whitfield County Parks and Recreation Master Plan the design and development is a work in progress. Phase 1 includes baseball fields, the Miracle Field, west park entrance, restrooms and entrance road. Grading will start in September.

Phase 2 will include amenities such as football fields, basketball, tennis courts, lake related activities, trails, picnic area and fishing pier. During the offseason our Public Works Department may be able to start work on the walking trail system.

Expanding the Park beyond Phases 1 & 2 and as capital dollars are available, other features will be constructed at this facility.
